ADW, 5/1/89 #3: "The first thing God made was time." - Bunyan}

**The Orphanage** has reserved The Delectation Dome of the Hotel California for the celebration of the 466th Anniversary of the **Confessio Augustana**. The Loyal Order of **Un-reconstructed Freaks** has encrypted the **Summer Tour Itinerary** as per a 32-bit microprocessor at a rate of 26 clock cycles per byte, to be run on less than 5K memory (XORs, +, table lookups on 32-bit operands), thereby foiling The Pigs' reliance on mega-crunch search strategy vis-à-vis the Revisionists' ability to monitor institutional mainframes. **Matthias Flacius (Illyricus)** has specified a 64-bit cipher with a variable-length key of up to 448 bits. The Little Orphan Children sub specie ADW 12/1/93 (Fabius Cunctator, Irleton... Kitchener Pasha) are to sequentially factorize Cromwell's address to Parliament, **July 4, 1653**, by calibrating the **complete modular exponentiator** as per "YOU ARE ON THE EDGE OF PROMISES AND PROPHECIES." **Nota Bene:** The Pelagians can only analyze any given transmission as "a single, fixed state at a specific moment" which renders **Polynomial Time** invisible to their heathen analysis. **The Midget Tag Team** has circumvented both The Problem of Decoherence (cf., superimposed waveforms at 1° Kelvin) and the necessity of  $(1/(1-p))^n$  gates by the **FOURTH LEVEL** application of "Behold, I make all things new."

ADW, 5/1/89 #2: "that she, like common earth, could rot" - Lord Byron
